Rayhan is a data-driven professional with a robust background in business analytics and machine learning modeling. Recognized for adept project management skills and innovative application of data science, he excels in generating business insights, driving revenue, and implementing process improvements. Rayhan brings substantial experience in both retail and financial services, showcasing a strong passion for analytics roles across diverse industries.

Professional Experience

Data Scientist Assistant Manager — CIMB Niaga

Nov 2022 - Present

- Identifies viable business opportunities to enhance company's revenue growth. Utilizing a range of methodologies including A/B testing and machine learning approaches.
- Provides insights into the company's overall business trends, root causes, and forecasts, allowing informed decision-making across the organization.
- Designs data structures and pipeline automation, capable of handling Big Data, analytical models, and traditional business intelligence/data warehouse reporting systems.
- Conducts end-to-end verification of project execution processes using the Sprint method to identify issues, analytics approaches, and result tracking.
- Key Achievement: Generated IDR >2 Bio cost savings over a 6-month span of ATM placing recommendations, enhanced project revenue by a monthly increase of 47% in a multiclass top-up prediction model.

Senior Data Processing Specialist — NielsenIQ

Jun 2022 – Nov 2022

- Oversaw surrounding teams in regard to field survey preparation and execution. Focused scope includes determining sample amount, questionnaire design, data acquisition methods, and project timelines.
- Formulated training materials for SEA team, in scopes of data processing, IT support, and query handling.
- Coordinated system migration, which included analytics calculations, tool adjustments, and result checks.
- Performed end-to-end data processing flow, including data adjustments, validation, analytics, and tools improvement, in order to bring impactful insight to the clients.
- Key Clients: Frisian Flag, Procter and Gamble, Shell, Multi Bintang Indonesia, Orang Tua Group, Holcem, Indocement, Japan Tobacco International, Mars, Omron, Abbott, AkzoNobel, and Bukalapak.
- Key Achievement: Saved potential cost up to IDR 84 mio/year by generated internal platform of Business Intelligence tools for two clients.

Operation, Data Processing Executive — NielsenIQ

Dec 2021 – May 2022

- Performed data validation using statistics and empirical approach to ensure the accuracy of metrics used.
- Built processing tools including database design, automation, and quality control checker, to ensure that the data is processed in the effective manner.
- Developed deep understanding of highlighted changes, evolving patterns, and other insights, to improve the client's product sales and business processes.
- Presented output on engaging dashboards or other self-served data products (Tableau, Excel VBA, etc.)
- Key Achievement: Built automation tools to accelerate end-to-end processing time to >80% faster.

Data Scientist Intern — Deepublish Publishing

Jan 2022 – Feb 2022

- Gathered, organized, and converted raw data into usable information while ensuring its accuracy for data preprocessing to model deployment.
- Generated interactive dashboard using Google Data Studio to provide insights of top selling products, marketing channels, and other sales patterns.
- Developed a regression model to predict the amount of products sold with >70% accuracy.
- Key Achievement: 100% targeted KPI are achieved: Generated dashboard and sales profiling per area.

Business Transformation Consultant — PT Sucofindo

Jul 2021 – Dec 2021

- Emphasized on Industry 4.0, performed client's company assessment based on as-is and to-be business model.
- Devised strategic recommendations based on the INDI 4.0 frameworks. Including Human Resource, Company Culture, Operation, Information Technology Maturity Level, and Product sectors.
- Key Achievement: Generated robust recommendations to a total of 12 clients, closely related to banking, FMCG manufacturers, and logistic/supply chain.

Geostatistics Modeler Intern — PT Adaro Indonesia

Feb 2019 – Mar 2019

- Worked closely with Geology Department to validate mining data. Tools used: R data distribution model.
- Performed 3D coal modeling and resource classification by using Ordinary Kriging, Block Model method.
- Key Achievement: Proposed new method to classify coal resource estimations with <5% error margin.

Education

Bachelor of Geology — Universitas Indonesia

Jul 2016 — Aug 2020

GPA: 3.47

Science — SMA Negeri 1 Bogor

Jun 2013 — Jul 2016

GPA: 84.08

Academic Achievement

Best Graduate — Machine Learning Development Program by Binus University

Jul 2023

5-month comprehensive training to solidify data science, machine learning, and deep learning skills.

2nd Runner Up — National Study Case Comp. by Forum Geosaintis Muda Indonesia

Sep 2018

Risk-based exploration and volume estimation of Indonesia's geothermal and oil – gas resources.

Organization and Volunteer

President — Seksi Mahasiswa Ikatan Ahli Geologi Indonesia Universitas Indonesia
